Does your air conditioner really need a preseason check-up?

It starts in the early spring every year. You start receiving letters and phone calls from heating and cooling service companies who want to come to your home to check out your air conditioner and get it ready for the cooling season.

When you own a top-of-the-line air conditioner such as the **Comfortmaker**[®]

SoftSound™ SXT+ two-stage model, do you really need to pay someone to check it out every year?

The answer is a resounding “yes.” Here are three important benefits of a preseason check-up:

1. Cut your electric bill. To operate at top energy efficiency, your air conditioner needs to have just the right amount of refrigerant. A qualified service technician can check your system for refrigerant leaks and make sure it is charged properly for maximum efficiency operation.

2. Extend your air conditioner’s life. A service technician can perform preventive maintenance checks to help you avoid expensive repairs in the future. Regular

preventive maintenance can extend the life of your air conditioner and make it more efficient.

3. Your warranty may require it. Most manufacturers now cover their air conditioners with warranties up to five years on parts and up to ten years on compressors. Just as most car warranties require routine service, some air conditioner warranties now require annual preventive maintenance.

Comfortmaker central air conditioners are covered with a 5-year parts limited warranty. Comfortmaker compressors are covered with either a five- or ten-year limited warranty. Mainline models are covered by a **No Hassle Replacement™** limited warranty.*

The manufacturers of Comfortmaker products believe that annual preventive maintenance is so important that Comfortmaker warranties require homeowners to have their systems checked and serviced by a qualified service technician once a year.

SoftSound™ SX 2400 Series High-efficiency Air Conditioners Good Investment for Homeowners

High-efficiency split-system Comfortmaker® SoftSound™ SX 2400 Series air conditioners feature environmentally sound R-410A refrigerant and offer a good investment in long-term operating cost savings with an attractive payback for homeowners.

The Comfortmaker SoftSound SX 2400 Series split-system air conditioners can achieve 15 SEER when matched with appropriate coils and blowers. Available in capacities from 1-1/2 through 5 tons, these high-efficiency air conditioners provide quiet operation and 14 SEER performance when matched with the proper indoor coil. When these models are matched with high-efficiency indoor units, they achieve up to 15.0 SEER.

The SoftSound SX 2400 Series air conditioners offers the following top-of-the-line features and benefits for custom homes and customers who want the best:

- **Environmentally sound refrigerant** - Unlike traditional refrigerants, R-410A refrigerant does not damage the ozone layer with harmful chlorines. Because the traditional refrigerant, R-22, is being phased out, the environmental and money-saving benefits of R-410A will continue to increase.
- **Quiet Operation** - Copeland scroll compressors,

industry-respected for reliability, and two-speed fan motors provide quiet operation by operating in the quieter, lower speed most of the time. An Air Management System ("AMS") with increased fan propeller diameters improves air distribution without increasing sound. Sound jackets and a sound-reducing fan orifice further reduce noise levels.

- **Self-diagnostics** - Comfort Alert™ troubleshooting LED fault indicators in many models help service technicians accurately diagnose practically all system-related malfunctions.*

- **Premium Appearance** - All models feature appliance grade high gloss paint and post-painted (black) coil fins for an unequalled contemporary look.

- **Industry Leading Warranties** - SoftSound SX 2400 air conditioners are covered by a 10-year compressor limited warranty; a 7-year outdoor coil limited warranty, a 5-year parts limited warranty and a 7-year **No Hassle Replacement™** limited warranty. The **No Hassle Replacement** limited warranty provides a new equivalent replacement unit if the compressor or outdoor coil fails during the **No Hassle Replacement** limited warranty period. Restrictions apply. Call us for details or visit the Comfortmaker Web site at www.comfortmaker.com.
